The marketing of sheep and lambs thus far this week has been of larger volume, there being an increase of about 200 over the same time last week and nearly 1,000 over the corresponding time a year ago. The receipts to-day were nearly 300 larger than a week ago and a year ago. The market opened with only moderate competition between buyers, and, in fact, shippers had things pretty much their own way. Therefore, they took advantage of the opportunity to press the market and finally succeded in getting a reduction of possibly 10c for an average compared with yesterday, although there were quite a number of sales that did not show quotable change. The trading was as active as the limited competition would admit, and a good clearance was finally made at the decline.
